Augusto S. Lima

Full Stack Developer · Java · Angular · Groovy · Kafka · PostgreSQL

Brasília, Brazil · augustolima.pages.dev · linkedin.com/in/augusto-s-lima-8167352a6 · github.com/AugustoSodre

EXPERIENCE

ZG Soluções · Software Developer (intern) · Remote — Mar 2026 – present

- Full stack on ZG Repasse: Angular on the front end, Groovy + Micronaut on the back end, event-driven microservices with Kafka.
- Business rules in approval workflows, audited through Kafka events; Userflow integration for in-app onboarding.
- PostgreSQL with Liquibase migrations and zero-downtime deploys.
- Testing with Spock (unit, integration and API); quality with CodeNarc, JaCoCo and code review.
- Generative AI in daily work (Claude Code, Gemini): SDD, TDD, multiple agents, ticket specs and code review. Scrum, from refinement to code review.

AceleraZG 8.0 · ZG Soluções · Trainee Developer — Aug 2025 – Feb 2026

- Selected among 2,000+ applicants (Top 24) and hired at the end of the program (Top 5).
- MVP of a hospital product in an agile squad, with a microservices architecture.
- Legacy code refactoring: Angular on the front end, Grails + Kafka + Spock on the back end; Swagger and Git Flow.

UniCEUB · Lab and Programming Teaching Assistant — Feb 2024 – Jul 2025

- Introduction to C for 35 first-year students.
- PHP, SQL and HTML/CSS workshop for 15 students, 100% completion.
- Digital inclusion classes for seniors: Office, online safety, fake news and an introduction to LLMs.

PROJECTS

AutoMatch · team project

- Car recommendations: Angular front end, Node.js/Prisma back end and a PyTorch two-tower model served with FastAPI.
- My part: most of the Angular front end and the initial version of the recommendation engine.

Linketinder · solo project

- Skills-based recruitment: Groovy REST API and CLI, PostgreSQL (7 tables), Spock tests and a TypeScript SPA.

ANS/TISS Web Crawler · solo project

- Groovy + Jsoup collecting the TISS health-data standard's documentation and version history, with CSV export.

EDUCATION

UniCEUB · B.Sc. in Computer Science — Feb 2024 – Dec 2027 (expected)

SKILLS

Languages: Java, Groovy, TypeScript, JavaScript, Python, C, Go, PHP, SQL.

Frameworks and tools: Angular, Micronaut, Grails, Spring Boot, Kafka, Spock, Liquibase, Docker, Git, Linux.

Databases: PostgreSQL, MySQL, MariaDB, MongoDB.

Concepts: OOP, data structures, microservices, distributed systems, CI/CD, SDD, TDD, agile.
